## NAISHHAZE 2010

We've always loved the Haze for just throwing on the water and thrashing it no matter what you're into or what it's blowing. Apparently, there's a little more to the '10 Haze...as overheard in a barbershop: "De Haze delivers reliable puh'fo'mance fo' all rida' levels in all condishuns. Fo' beginners and advanced freeriders alike, easy be baaaad. De Haze gives ya' de reliability t'snatch yo' kitebo'din' anywhere ya' wanna go. 'S coo', bro. Outline, rocka' and flex gots all been engineered t'provide powa' when needed, and control at a moment's notice. De outline be blend uh de Tho'n (80%) and da damn Sol (20%). De Haze shares de same low rocka' as de Tho'n fo' efficient plannin', and inco'po'ates some unique flex fo' de ultimate in control"

## THE NEW KAHOONA

"Do wot Guvnor!" said Frazer to us of the new Kahoona. "The newly improved Kahoona blends exceptional performance and 'andlin' wiv ease of use and safety features that make it the bleedin' perfect kite for advancin' yor ridin' level, regardless of yor preferred ridin' style. Experienced freestyle riders 'oo lov the bloody Kahoona's astonishin' 'angtime and great low end power will be blown oray by the improved 'igh wind ability and enhanced stability. Revisions ter the 'chuffin' wingtip design and canopy geometry along wiv the introduction of a new 5.5m size 'elp make it the perfect all conditions trainin' kite. Responsive unhooked 'andlin', great dahnwind drift, and auto relaunch combine ter make the Kahoona the most evolved big wave surfin' kite we've ever made. The Kahoona's boost, hangtime, stability, auto-relaunch and 'andlin' wiv 'elp yer progress faster than yer fought were possible". ## FROM DAWN TILL DUSK

"Dusk and Dawn stand for an innovative, multifunctional sports and casual sunglass for athletes" say Triggernaut of their new shades. And you thought they meant the local lapdancers. Triggernaut continue "High-end shatter proofed polarized polycarbonate lenses afford always a perfect view on water, in powder and while riding a bike. The lenses absorb 99,9% of reflected glare from shiny surfaces in front of you. Thus Polarization turns up the colors your eyes can perceive" which is far more exciting we think you'll agree. Dusk and Dawn are suitable for normal sized heads, thusly anteaters and hammerhead sharks should try elsewhere. [www.triggernaut.com](http://www.triggernaut.com)

## XELERATOR 2010

Xelerator's back and leading the way with their two year deck breakage warranty on 2010 Thrill and Kick Twin tips. The Thrill is an all terrain free ride twin tip perfect for huge jumps, freestyle and power carves in the surf. The Kick is designed for riders who are pushing new school freestyle to the next level and demand a board that will deliver monster pop in all conditions. Both twinnies feature wood cores, multi axial layup, PBT top and bottom sheets, and feature the new TPFC (Thickness Profile Flex Control) concept perfected in their speed boards. TPFC enables the flex to be tailored to the rider's weight in the factory at no extra cost. The all conquering Epic and Epic wave boards have been tested throughout the UK winter to destruction by the world's best in Cape Town. For 2010 they benefit from new graphics and leash plugs as standard. [www.xeleratorkiteboarding.com](http://www.xeleratorkiteboarding.com)
